

For the sake of the environment

1. In order to avoid unnecessary waste of valuable energy, please note that the windows are closed when the heating or air conditioning is on

2. Take the key card with you when you leave the room. Please do not insert a replacement card

3. Your towels are changed several times a week. If you do not need a fresh towel daily, please hang it back on the hook so we can save energy, water and detergent. If you do want them changed, please throw them in the shower

4. In order to be able to recycle a large part of our waste and to produce as little residual waste as possible, we ask to separate your waste before disposal. Our waste separation system is located on the ground floor in the seminar rooms as well as the parking lot. Please do not throw any waste or hygiene items in the toilet, but use the waste bin provided

5. If you work close to the hotel, we will be happy to loan you a bicycle to take on your way to your place of work

6. In order to save resources, you can request the following items from the reception instead of in your room (sewing kit, dental kit, razor, bathrobe, slippers)

We are happy to hear your feedback as well as further suggestions and ideas!
