

Love the Environment *Together*

Together, we can make a valuable contribution
to protecting our environment.

1 Use energy wisely

To avoid unnecessary waste of valuable energy,
please make sure that the windows are closed
when the heating or air conditioning is on.

2 Don't forget your keycard

When you leave your room, please take your keycard with you.
Please do not insert any replacement card.

3 Use towels mindfully

Your towels are changed several times a week.
If you would like to skip a change, simply hang them back on the hook
to save energy, water and detergent.
If you would like fresh towels, please place them in the shower.

4 Separate your waste

To recycle as much waste as possible and produce
as little residual waste as possible, please separate your waste.
Our waste separation system is located on the ground floor
in the seminar rooms as well as in the lobby.
Please do not dispose of any waste or hygiene items in the toilet,
but use the designated waste bins.

5 Travel sustainably

If you are working near the hotel, we are happy to provide
you with a bicycle for your commute.

6 Save resources

To save resources, the following items are available
on request at the reception instead of in your room
(dental kit, razor, bathrobe, slippers).

We are always happy to hear your suggestions and ideas!

Thank you for your support!
